Inspector

Inspection passed

Norm UL 969 fulfilled

Permitted distribution for the US market

Labeling

without components

Non listed labeling

Electronic products

Unauthorized printing of characters

Labeling with any label

Inspector

Inspection failed =
Warning penalty

Labeling regulation not fulfilled

Not approved for the US market

Benefit from the advantages

- The name stands for acknowledged safety and high integrity
- Reduce your certification costs by reverting to approved UR components
- Speed up the launch of your product for the US market
- We are a UL authorized company and is entitled to print all types of logos (cf. section PGAA - Plant Nuremberg)

Product

- Product approvals for indoor and outdoor applications
- Use existing UL listed components:

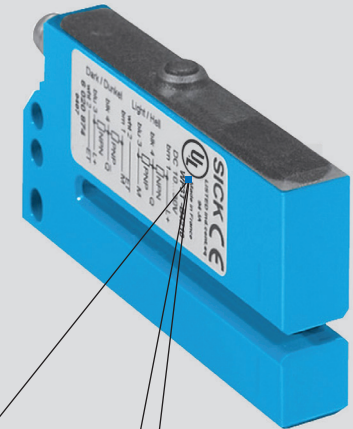

Version 1

Label material and thermal transfer ribbons from our product line. We produce blank labels, which you can imprint variably yourself or we will imprint them for you. Registered under them UL File MH25096.

Version 2

Labels completely imprinted for immediate use. Registered under them UL File MH15511.

UL labeling with listed UR components

Underwriters Laboratories

Approved as a printable variant under UL file no. MH25096
Label unprinted or printed with various TT ribbons
