The World of Labeling - A Perfect System

- Nameplates
- Security labels
- Functional die-cut parts
- Labeling systems
- **Thermal printing systems**
- Barcode reading systems

Benefit from the advantages

Efficient Flow

Marking

Innovative identification

Individual label printing using thermal transfer printers

All symbols plus barcode/2D matrix code

> Label with unique identification

Fast application of numbered label

Unique product with identification

Unique identification enables automatic traceability

Marking

without identification

Conventional identification

Corporate label or nameplate without identification

Only digits/characters possible after the fact

Use of two identification methods

Application of different identification labels

> Marked product

Costly. **Purely visual** or manual traceability

Cost and time savings through a central label production

- Free choice of label dimensions
- Inclusion of barcodes/2D matrix codes
- more data in a smaller space
- Enables fast and accurate data collection also over larger distances
- Secure traceability
- On request you will receive quality tested labels including a test report

Product

- Multitude of product variables are available; selection of a suitable adhesive will be based on your requirements
- High grade adhesive materials offer excellent weathering and chemical resistancies
- Suitable also for structured plastic substrates
- Imprinting with all common print systems
- Selected barcode scanners / data recording devices achieve excellent reading accuracy
- Optional

Conventional Identification

- protective laminate for highest mechanical resistancies
 - paint mask laver available
